

Barco mFusion ICMP-XS

Integrated Cinema Media Processor (ICMP) - Compatible with Series 4 projectors

A fusion of cutting-edge technology

The Barco mFusion is three devices in one: an audio processor, a streaming device, and a cinema media server. This integration delivers unparalleled performance and versatility, making it the most integrated solution on the market today. Here's what makes the mFusion ICMP-XS stand out:

- State-of-the-Art Audio Processor: Experience cinema like never before with 5.1, 7.1
- Groundbreaking Media Server: Simultaneously play, ingest, and transfer content with ease. The mFusion ICMP-XS ensures smooth and efficient media handling. Fewer boxes lead to more reliability and ease-of-use
- Streaming Box: Deliver real-time content from anywhere in the world, breaking the boundaries of traditional media servers

Unmatched performance and versatility

The mFusion is engineered to deliver unparalleled performance, supporting up to 2D 4K60 and 3D 4K30 resolutions. This ensures that every frame is rendered with stunning clarity and detail, providing an immersive visual experience for audiences. The advanced audio options, including AES3 and AES67 AoIP, guarantee superior sound quality, making every note and dialogue crystal clear.

Revolutionary user interface

The mFusion ICMP-XS utilizes the same new revolutionary user interface as our Series 4 platform: the first and only integrated UI for projection, media server, audio processing, and streaming. Accessible via computer, handheld device, or the integrated touch display on Barco Series 4 projectors, this interface maximizes workflow efficiency and significantly simplifies operations

Compatible with Barco Series 4 family.
